MINDSPIRE CONSULTING'S CBS COMPETENCIES

- MINDSPIRE Consulting provides **professional IT system integration services for European banks.**
- Based on our decades of experience, **we can assume full responsibility for CBS transformation projects.**
- Using our **practice-proven and regularly updated core banking transformation methodology**, our experts can significantly reduce the expenditures allocated to strategic planning and help to eliminate infeasible ideas at an early stage.
- Our services include support for **system analysis, project management, test coordination, creating functional specifications, and testing.**
- We can also **coordinate the involvement of additional solution providers, identify technical focal points, pinpoint issues requiring management involvement, and develop possible solutions.**
- We can also execute the **integration tasks of the entire core banking system, even within a fixed-price contractual agreement.** In this case, the **integration of the bank employees into the team** executing the tasks is also possible.
- In addition to our services related to Core Banking Systems, we also provide **Banking Data Migration and Banking Project Management Office (PMO) services.**
- MINDSPIRE Consulting also provides **custom software development services**, tailored to the specific needs and expectations of the banking industry.

MINDSPIRE CBS METHODOLOGY

TEMENOS TRANSACT COMPETENCIES

- Our expert **Temenos Transact team** has many **years of experience** in implementation, integration, and system operation.
- MINDSPIRE consultants and developers have a **thorough understanding of the operation, logic, and IT solutions of the Temenos Transact (T24) core banking system.**
- We can provide **critical business or IT expert resources, implement a specific project, a core banking system replacement, or a business transformation program.**
- Our experienced team of consultants can **provide efficient support at all stages of the implementation and use of the Temenos Transact core banking system.** Several of our consultants have 10+ years of domestic and international Temenos T24 implementation and operation experience.
- **During implementation,** our services cover project initiation, planning, custom solution development, application parameterization, interface design, testing of CBS and related banking systems, and preparing the IT environment for the live operations of the Temenos Transact core banking solution.
- **Following the successful implementation,** our experts will be available continuously to support the day-to-day operation and optimization of the Temenos CBS, the installation and deployment of updates, the maintenance of the localization package and OFS API, and the functional enhancements.
- On request, our experts can provide **Temenos Transact training and education** to help bank the employees to work efficiently.

CAPABILITIES TO SUPPORT

Temenos implementation projects

MINDSPIRE's capabilities offer different entry points and possibilities for mid or large-scale Temenos implementation (including migration, upgrade, integration) projects. These can readily augment a set of core T24 subject matter expert resources to create a full project set-up.

Current MINDSPIRE capabilities as leverage

Proven PMO methodology and staff in international projects.

Proven migration methodology and toolset used in multiple M&A projects.

Senior business and system analysts with experience at different core banking system implementation projects.

Senior program and project managers with 10+ years of experience of banking IT program and project management and vendor management.

Value propositions for Temenos delivery projects

01

PMO functions:

Managing the project support activities with emphasis on document management.

02

Data migration:

From particular activities to undertaking E2E migrations in multinational environments, or just providing methodology and expert support.

03

Provide key resources:

Offering managers, analysts with supporting junior personnel for executing specific tasks.

04

GAP analysis:

Conduct Process Led Workshops and detailed business requirement analyses focusing on local regulatory requirements.

05

Test management:

Providing test management and test analyst resources.

06

System integration:

Offering integration specialists and integration managers with experience.

07

Cutover management:

Use a proven and well tested tool (MINDSPIRE OMEGA Cutover Tool) and methodology for managing complex cutover activities.

08

Service Management and Operations processes:

Provide IT Operations and Service Management experts for smooth BAU transition.

09

Add-on Developments:

Create custom functionalities in addition to the T24 ecosystem.

WHY CHOOSE

MINDSPIRE'S TEMENOS TRANSACT SERVICES?

Our company...

can take on a full system integrator role due to its knowledge of the Temenos Transact core banking system and its own implementation methodology, as well as through its efficiency-enhancing tools that can manage even the most complex changes in banking systems.

Our consultants...

have more than ten years of Temenos CBS implementation and operational experience, and many of our business analysts and systems integrators have several years of experience in a major large banking Temenos Transact implementation project.

Methodology

We offer our own CBS transformation methodology proven in a number of core banking projects to our clients.

Our experts use the methodology to reduce the cost of strategic planning.

Toolset

With our templates, core banking transformation projects can be executed more efficiently.

Our proprietary tools can reduce the risks of transformation projects.

Resources

Our team of over 80 experts has proven its ability to deliver on several occasions.

We have been involved in many successful and significant core banking transformation projects, both in Hungary and in the region.
